Kalamazoo are agitating not only residents of the northeast country but sportsmen from many sections of the state. The matter is of vital importance to this section of Michigan where so many of the trout streams lie. It may be of equal importance to trout fishermen in gen-eral and to conservationists. How much so cannot be judged until the conservation department has aired thoroughly its reasons for the con-templated move. With no such statement yet issued, the case appears to be overwhelmingly in favor of the contentions of conservationists and trout fishermen who object to the removal of the hatchery to the south.

So far as has yet been made known. the conservation department's main argument is based upon a policy of concentration of fish hatcheries, this concentration to be in the southern part of the state. They may have Stratford Arms Apts., Pontiac. other reasons, but they have not been explained, so far. Against this, the petitioners to have the hatchery left in Grayling offer some appealing arguments and facts.

the hatchery itself from the time it was organized by 301 Michigan residents from all over the state. This On the record, the hatchery is shown have been the best in the state It is also shown to have dropped off tions, "manufacturing" plants, the in recent years under state control products of which are distributed for from its productiveness under privso it was sold to the state.

Secondly, they point out that for a trout hatchery a point nearer the streams is more logical than a point two or three hundred miles away. They discuss temperature of water, necessity of transportation a long distance to the streams with consequent loss of fish, and the exthus involved.

Thirdly, they consider the fact that that to abandon it and build a new one at Kalamazoo is, in their viewunnecessary extravagance.

They offer other arguments, some of them amplifications of these three. There is no doubt but that these n from the trout stream section of the state make a strong argument. commission that the commission give more light on the reason for this

One of the first assets of the conservation commission is the reputation it has for being free from political influence. It would be unfortunale, indeed, if this reputation became chuded. It can hardly be argued that there are political considera-tions behind-the movement to keep this hatchery in the heart of the out fishing territory. The petitions care not signed by residents of this section alone. The argument that the hatchery should be near the trout reams, in the same climate and me water conditions is excellent mce of sincerity.

It is not fair to argue either that pelitical considerations influence the repeal to remove the hatchery to maso, There are not enough metamicsion plan to permit of judg-

But most evidently, in the interest of proper conservation and of the trout fishermen of Michigan and the visitors to this state, this entire situation should be given a thorough airing. The commission may have much more in support of its propose policy than has come out. But until petition against removal.-Bay City

Super Shell Ethyl

At all Shell stations beginning Saturday, February 21

Livelier, quicker anti-knock gasoline . . . because science has found a way to REMOVE EVERY SLOW-VAPORIZING, LAZY PARTICLE

Now . . . science's new, perfected anti-knock fuel!

Super-Shell Ethyl is different. It contains Ethyl fluid, of course -a generous charge that assures positive anti-knock value. But with this is now blended a special gasoline.

Shell engineers developed it. They knew that inferior gasoline --no matter what was addeddoesn't deliver best performance in your car. They set out to make anti-knock fuel utterly free of slow-firing, harmful, "heavy" gasoline particles. Months of experiment . . . then they succeeded!

It is a matter of "washing" the gasoline in a series of huge refining towers where the gasoline vapors travel over Shell's amazing system of "bubble cap trays." Here all the harmful, heavy "fractions" so often left in gasoline are "scrubbed" out.

Into a special pipe flows only the volatile, lively gasoline which Shell blends with Ethyl fluid!

Thus Super-Shell Ethyl gives you finest engine operation. Quick starting. Smooth, even power. High anti-knock value.

Now . . . see what really fine performance your motor is capable of giving. Try this new Super-Shell Ethyl today. One test will convince you.

most of his posttion. He felt that his mature age and experience gave him the right to rections and in no small way to control the actions of the younger mem-bers of the family. George very much enjoyed the power which his senior. ity gave him, and

though the younger boys were often galled by his authority—it was easier on the whole to submit in most cases than to revolt and have a riot. the same point of view which we not furnace at the school house, near the top of the stairs, fell, vieing with show clowns as to the double sumexercise authority over us, but we say nothing.

Desire for Power

By THOMAS ARKLE CLARK

Dean of Men, University of Illinois.

George, who was twelve, was the oldest of the five Van den Berg chil-

dren and made the

But George's authority was for the time being coming to an end. He was going off for six weeks to a summer camp and Fred, who was the next oldest in the family, was looking for ward with engerness to his own ascentimt with George out of the way it would be easy. When George was on the train and well on the way to camp Fred turned to his mother and remarked with a sigh of satisfaction:

"Well, mother, it's a great relief to be rid of George." With George gone his desires for power were to have fewer inhibitions. It is strange how many people want

president of the Rotary club, or head of this or that, and all because the position gives them some prominence or authority. There is never an offic open that some one is not eager to fill it.
I had two letters in this morning's

mail from members of an organiza-tion to which I belong. Each one wants to be national president of the organization, and they are sending out much literature, and expending much time and money to bring about that result. It is the thirst for anthority, the desire for power which is urging them on, and they are quite willing to spend time and money to reach that end. Two hoys were in my office

Each one wants to be appointed to a position of authority in college a position which carries with it a considerable amount of power. But neither one has given much consideration to the responsibility which goes with authority and power. There is work to be done; there are decisions to be made; there are embarrassing tions to be met by those who have executive position and power, and it is these things rather than the loomed up before me when I have considered any position of power or authority. Too many men whom I have known do not know how intelligently to use authority. They do not realize that power is sometimes the most delicate, the most dangerous, the st difficult thing to use properly.

Tri-County Phone Co. Offers Stock to Public

Tri-County Telephone Company is now offering to the public its Class "A" Stock. This offering is the first stock placed by the Company, whereby the public will have an opportunity to participate and is in response to the company's policy to place its stock in the different communities now being served by it. The present offering is for \$250,000 of which about 25 per cent is allotted to or has been subscribed by its employes.

For the purpose of handling this and all future issues, the company has organized a stock unit as part of its commercial department. The company intends that this issue and all future sales of stock are to be offered through its commercial department and its employes and no outside salesmen will be employed.

This Class "A" Stock is preferred as to assets and dividends, and is also cumulative. It also enjoys the same rights as first preferred as to assets, dividends and cumulations in the event of liquidation, and is callable by the company any time prior to January 1st, 1959 at \$105,00 per share plus any unpaid dividends and the entire issue must be redeemed before January 1st, 1960.

The Tri-County Telephone Company, one of the largest independent telephone companies in the state of Michigan, is now operating in thirteen counties in Michigan and this territory is divided into three divisions, viz.: the eastern, northern and southern. The eastern division is wholly in Lenawee county, while the northern division comprises exchanges in Alpena, Montmorency, Crawford, Otsego, Alcona, Oscoda, Presque Isle and Roscommon counties; the southern division operates exchanges in Van Buren, Cass, Allegan and Kala-mazoo counties. In all the divisions the company is the owner and operator of thirty-eight exchanges, and in addition renders toll service to several connecting mutual companies. The territory served by the company is well diversified as to agricultural, industrial and resort business.

Radicals in Senate Keep Up Fight Against Drought Relief Compromise—Schall Attacks Attorney General Mitchell.

By EDWARD W. PICKARD

K senate gave up hope of defeating the compromise on drought relief appropriations which was outlined a week ago, for Robinson of Arkansas, Democratic leader, and many others prominent in

his party indorsed it as the best that could Senator Blaine be obtained. Both changed their stand, defended President Hoover, expressed their con fidence in Secretary of Agriculture Hyde and admitted that the work of the Red Cross in the drought area had improved until it was now adequate to the situation. Robinson said he was not trying to save his face, but honestly believed that the com promise agreement would do what was necessary.

Secretary Hyde was asked to tell the senate whether in his opinion noney obtained by farmers under the compromise plan could be used to bus food. His reply was yes.

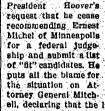

La Follette and Blaine of Wisconsin, Norris of Nebraska and other insurgents continued to denounce the compromise as bumiliating, wicked. The funds for its payment were injected into a campaign preceding shameful and altogether wrong Young from the general fund but the submission of the question.

Bob denounced the Democrats for cooperating with the idministration, and asserted that "If we accept this surrender it means that we do nothing for the 22,000,000 affected by unemployment."

While he was speaking a committee of fifteen that was said to represent the workers' unemployment insurance delegation tried to get into the house of representatives with a big petition, demanding that Speaker Longworth so they might appear on the floor and state their case. The speaker refused this request and would not receive the committee in his office, so the petition was left with his secretary and the importunate visitors were gently pushed out of the Capitol by a bunch of policemen. The unemployed work ists, and the Washington police were out in force to prevent a Red invasion. WELL, the Smedley Butler incident is closed. The fiery marine gen-eral has expressed in writing his re-gret for his animadversions on Premier Mussolini, Secretary of the Navy Adams has formally reprimanded him for his indiscretion, and the order for been revoked. The public is disappointed for it had expected some spicy reading. Information obtained at Washington

is that Ambassador de Martino of Italy called on Secretary of State Stimson and discussed the Butler case in such a way that it was easy to infer that his government would prefer that Italo-American relations should not be imperiled through a presentation of the circumstances surrounding the alleged hit-and-run incident in a possibly acrimonious way. It was apparent that Mussolini would be glad if the matter were dropped entirely, so Mr.

R ADICALS in the Stimson suggested to Mr. Adams that a compromise might be effected, with the result stated above.

Premier Mussolini was quoted as saying in Rome: "I have already forgotten the whole matter, except the kind touch of friendship the American government showed towards Italy and

The measure carried the final \$100,000,000 of the board's authorized \$500,000,000 revolving toan fund. The senators, desiring to avoid blame if the board falls to accomplish results, rejected an amendment fered by Senator Black of Alabama which would have forbidden the use of any of the hundred millions for trading in futures on grain or cotton exchanges.

Southern senators were particularly exercised over the use of farm board funds by cotton co-operatives in trading in futures. By permitting its funds to be used in this way it was asserted that the board is encouraging

Unless the United States immedi ately undertakes to meet the business drive now being made by sever al European nations for the business of the South American countries, American trade will suffer a sharp recession, according to Representative Maas of Minnesota, who returned this week from an air trip to the southern republics. France, Great Britain, Italy and Germany, according to the Congressman, are making a strenuous and steady drive for business in the countries on the east coast of South America. An increased air mail service is one step toward cementing the trade relations of the United States and the South Ameri-

Documentary evidence of this opposition was sub-mitted by Mr. McKelvie to Chairman Legge. Activities of similar intenwere called to the attention of the Federal Trade Commission some time ago, McKelvie stated. The campaign according to the charge, is directed convincing farmers that the Federal Farm Board is keeping prices down, and persuading the farmers to withdraw from the Cooperative
